Recently a small deer went through a window at the boiler house of the Shool for Girls, chased by dogs, and last Sunday a motorist came upon four of them coming down the Winchester road, compelling him to stop after which they took to the woods.

Another shipment of good old clothing, linens and children's playthings is being made ready for Crossnore School. Call Mrs. Hoehn, tel. 536 if you have any contributions.

The maple trees hereabouts are being tapped and the adornment of cans and pails proves that somebody is busy making maple syrup and maple candies.

Anyone interested in securing pigeons, the property of the government War Assets Corp., may secure them by writing to the Consumer Goods Division, General products section, Railroad Retirement Bldg., Washington 25 D. C.

From Washington comes a report that extra money is sought in an appropriation to be used to eradicate the white pine blister rust in New England and New York. We've heard about this trouble with our trees here and it has been in evidence but somehow we doubt is anything will be done, money or no money.

The death of Raymond L. Buell of Richmond who died after an operation in a Montreal hospital on February 20th removes a political figure who had many friends here and at Mount Hermon. He was only 49 years of age and had been honored with several degrees by American colleges and universities. Surviving are his wife, a son and a daughter. At one time during his visit to friends here, he had considered making Northfield his home.

**"Got a telephone we could have, mister?"**

*"I sure have, Sis . . . if that's the house you live in. But don't go thinking it's just on account of your pretty smile."*

★ ★ ★

SCENES LIKE THIS . . . of telephone orders actually being filled . . . are taking place every day in many New England communities. For, in certain areas, telephone central offices are big enough to handle more connections. All that's needed are the telephone instruments themselves. And they're beginning to come in fast now from the factories.

In some places, though, the job isn't so simple. Vast behind-the-scenes work must be done before we can bring a telephone to everybody who wants one. We are stringing

wires and laying cables. We're having switchboards made and in some places we're already installing them. In some instances new buildings are being constructed to house the new switchboards.

It's going to take time to do all that . . . in some places, perhaps until late summer. But the point is, with manpower again available and materials more plentiful, we're doing the job just as fast as we know how.
